

RITRANSPARENCY REPORT 2020

Futuregrowth Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

Futuregrowth is a specialist investment company, which manages the full range of interest bearing and developmental investments in an ethical and sustainable way.

Our team of investment experts manages approximately **R194 billion** of assets across the full scope of debt products, from core funds through to yield enhanced funds, as well as a range of developmental impact funds (across a variety of asset classes).

We strive to keep our promises to clients through fundamental analysis that supports strong investment views. Our investment process uses a combination of value adding tools, including interest rate management and fundamental credit & ESG analysis, to add yield to clients' funds.

Futuregrowth provides debt and equity finance facilities to organisations looking to raise funds in the capital markets.

With a track-record of more than 25 years in the market we have the requisite skills set and the investment team is well positioned to:

- structure transactions that add value to both its clients and investee companies, and
- construct diverse portfolios that enhance returns, reduce risk volatility and produce relatively stable outperformance over time.

Futuregrowth is dedicated to the development and empowerment of South Africa and its people, with many of our investment offerings geared towards making a meaningful difference to our world. With this in mind the company continually strives to identify opportunities that will enrich the lives of our people through delivering economic and social returns that really matter.

00 08.2 Additional information. [Optional]

The two externally managed funds are listed below.

The **Futuregrowth Community Property** Composite is a portfolio specialising in the acquisition of new and existing shopping centres, which cater to the needs of underserviced communities throughout South Africa and forms part of Futuregrowth's suite of developmental investments. The benchmark is CPI + 4%.

The fund aims to outperform the CPI by 4% per annum before the deduction of taxes and fees and with income reinvested over a rolling 3-year period. The Composite seeks to provide investors with a low cost, high value property investment that focuses on emerging market retail property growth in underserviced rural communities and high density urban centres.

The Composite has purchased and developed 32 shopping centres located in rural and township areas countrywide over the past 20 years. These centres are located in seven of the nine provinces, providing retail services and products to a primary target market of approximately 10 million people.

Futuregrowth Agri-Funds, portfolios specialising in the investment of agricultural land, biological assets, agricultural infrastructure and other related farming implements, form part of Futuregrowth's suite of developmental investments. There are currently three funds in our suite of agricultural funds. Fund 1 is closed, Fund 2 is in drawdown phase and Fund 3 is open for investment. The benchmark is CPI + 10%.

The fund aims to outperform the CPI by 10% per annum before the deduction of taxes and fees and with income reinvested over a rolling 3-year period.

The funds' investments are in the actual farmland and infrastructure, which is leased to an approved operator to manage and run the farm. The farmland will be developed and managed in partnership with these large-scale agricultural operators to further enhance its value. All farms acquired have further development potential. According to a planned expansion programme, the Funds invest capital into farms to develop additional arable land. This may include the acquisition of adjacent farmland.

Our business

Futuregrowth Asset Management is a specialist investment company that manages around **R194 billion** of assets on behalf of our investors. Our large team of investment experts manages the full scope of interest bearing products, from money market funds to yield enhanced bonds, as well as a range of development funds. / Investment strategy As asset managers we aim to maximise long-term investment performance for our clients, which we do by identifying, sourcing and managing all potential sources of outperformance in our funds. Key tools are our interest rate strategy and asset selection process.

Interest rate strateg

Our approach to interest rate management is driven by fundamental economic factors, although we also consider many other market influences, including the potential impact of non-fundamental drivers. We use a top-down approach to formulate our macroeconomic view in conjunction with a bottom-up approach to price instruments. Together this forms our best investment view, which guides our investment strategy.

Implementation of the strategy includes optimising the mix of interest-bearing assets (cash, variable rate, fixed rate and inflation linked bonds), duration size and yield

curve position, that once combined, will drill down to stock selection.

Asset selection

Our asset selection process is designed to add yield to client funds by analysing and taking advantage of the opportunities provided in the lending markets. Using mainly a bottom up approach to analysis of borrowers, potential deals in both the listed and unlisted sectors are independently assessed. Key elements in the process are pricing for risk, and terms and covenants negotiated to protect clients' investments.

When seeking assets in the development equity space, we use our existing knowledge of companies and markets to identify long-term opportunities in unlisted equity.

Ongoing analysis of the relevant debt and equity instruments, including both economic and environment, social and governance (ESG) factors, is conducted.

The above sources of outperformance are blended with the aim of reaching the best possible outcome depending on the mandate and the needs of our clients. We are constantly seeking better ways to generate sustainable returns for our clients.

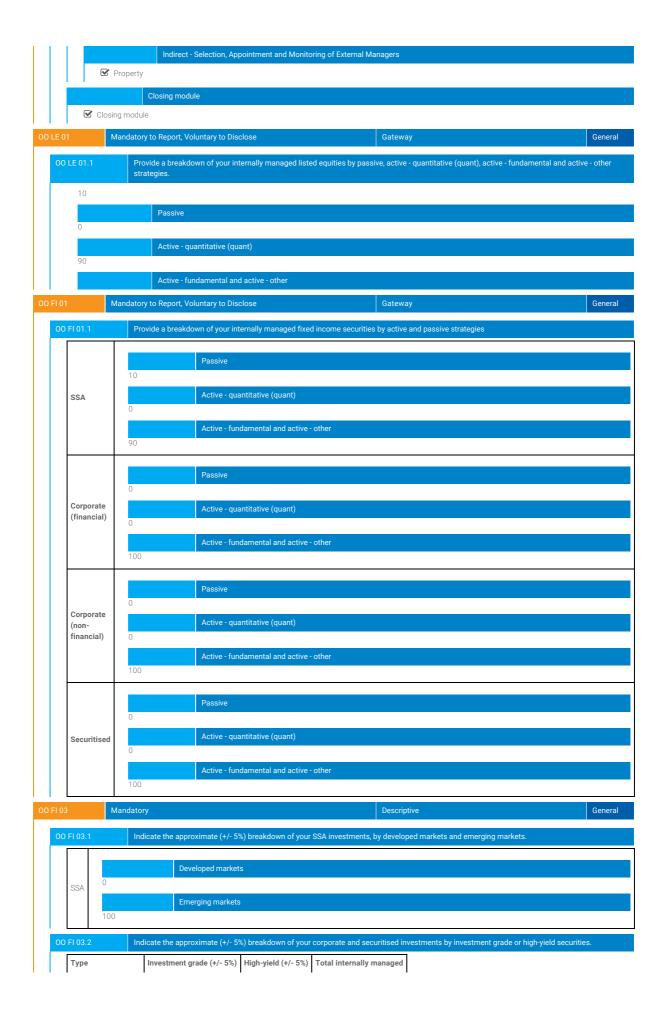

A word on sustainable investing

We consider that investors play a key role in the capital allocation mechanism of the economy, and our fund investors are part and parcel of South Africa's long-term development. We manage our business in a long-term, sustainable manner, we seek to assess each investee company in terms of their own sustainable practices including consideration of the counterparty's character, products and practices. We believe a responsible investor channels capital suitably to sustainable enterprises.

The Futuregrowth Development Equity (DEF) Composite

Other investment strategy, specify (2)

A portfolio specialising in equity and related investments in socially responsible projects and businesses or developmental assets, forms part of Futuregrowth's suite of developmental investments.

Objective

The Composite aims to outperform the benchmark with a nominal return of 18-22% per annum before the deduction of taxes and fees and with income reinvested over a rolling 3-year period.

Composition

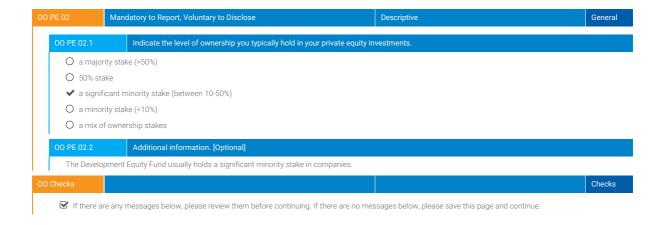

The Composite invests mainly in unlisted equity and participating instruments, but allows up to 20% in debt instruments. Although the Composite invests principally in unlisted transactions, relevant listed instruments are not excluded.

The Composite provides investors with a cost effective and flexible channel to participate in the infrastructure and development equity asset class. Investors benefit from the exclusive ability to access an existing pool of stable assets, access to a flow of developmental transactions, a lower than market fee and the ability to play a role in creating a new pool of risk capital for South African development.

In order to retain adequate liquidity and flexibility, and in the course of managing new investments, asset maturities and sales and fund-flows, the Composite usually maintains a high degree of liquid and/or non-developmental assets.

Social Impact

The Composite aims to provide investors with a vehicle that facilitates infrastructural, social, environmental and economic development in southern Africa, while maintaining a high degree of exposure to developmental assets, and delivers on a variety of social impact requirements such as job creation, affordable housing, access to services and healthcare.

SG 01 CC	Mandatory to Report, Voluntary to Disclose	Descriptive	General
----------	--	-------------	---------

Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon. ✓ Yes Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment We have identified physical and transition climate-related risks and opportunities and factored them into our fundamental analysis as part of our ESG risk tools and analysis. In cases where we identified a material risk, this would affect the rating and pricing of the underlying issuers/investee companies. Some of the physical climate-related risks we identified and their associated impacts included the following: 1. Agriculture sector where our clients have exposure and were affected by the disruption to operations and trade arising from severe/ extreme weather events in particular. For example, in South Africa we've had severe storms, droughts across the country which has resulted in water scarcity. We assessed the water risk related to the agri investment, in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had sufficient mitigation strategies (e.g., water wells) in place to counter the low rainfall and in some cases the businesses had been sufficient to the low rainfall and the businesses had been sufficient to the low rainfall and the businesses had been sufficient to the low rainfall and the businesses had been sufficient to the low rainfall and the businesses had been sufficient to the low rainfall and the businesses had been sufficient to the low rainfall and the low rainfallcases there were none. In addition, our clients are invested in assets that have exposure to other climate events (e.g. red-tide effect) due to global warming and has resulted in a write-down to the value of the investment. 2. Energy and resource security that arise from climate change has also been factored in by assessing issuers/investees in terms of materiality to their operations and how this affects their profitability e.g. in companies that are water resource dependent, we have assessed alternative water sources availability and water security in the respective region 3. Infrastructure and property sectors have also been affected due to climate related events e.g. flooding causing damage to infrastructure and properties. We assess insurance coverage and ongoing maintenance of infrastructure and properties to ensure that these are maintained and up to date so that climate events like hailstorms, flooding will have a minimal impact. Some of the transition-related climate risks and opportunities we identified include the following: As part of our decision to transition to a low-carbon economy, we engage issuers/investee companies in carbon intensive industries or sectors that have inherent exposure to climate related risks, to determine their efforts to identify the risk, a strategy to mitigate and to report on progress in these areas on a regular basis. Opportunities in this area include: In an effort to transition our client portfolios to a low-carbon economy, we have invested a total of R8 billion in the renewable energy sector in South Africa. Our exposure is across a variety of wind, solar and CSP projects located across South Africa. O No Indicate whether the organisation has assessed the likelihood and impact of these climate risks? ✓ Yes Describe the associated timescales linked to these risks and opportunities. Physical risks: In reference to points above, the timescale were all within the short-to-medium term. In reference to the points above, the timescale were all with medium-to-longer-term. O No ✓ Yes O No Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities ✓ Yes Describe Not an "organisation" wide but "investment wide", which aims to identify and manage material climate-related risks and opportunities relating to the investments we undertakeon behalf of our client funds. O No Indicate the documents and/or communications the organisation uses to publish TCFD disclosures. ☑ Public PRI Climate Transparency Report □ Annual financial filings Regular client reporting Member communications ☐ Other ☐ We currently do not publish TCFD disclosures Policy setting out your overall approach ✓ URL https://www.futuregrowth.co.za/media/3130/futuregrowth-ri-policy.pdf Attachment (will be made public)

☑ Improved engagement to encourage change with regards to management of ESG issues Engagement to encourage sustainable change During the past year we engaged unlisted and listed issuers on various ESG related issues. Some of these included · Property sector engagement on board composition, risk management - in some cases we have agreed on timeframes to implement recommendations appropriate for the company • Retail sector engagement on board diversity, director tenure and transformation - this is ongoing. SOE engagement on governance and DMTN changes - some success but still ongoing with some of the SOE's. • In addition, we have undertaken an engagement via ASISA to materially improve listings standards for JSE listed debt. Improvements include better governance reporting and stronger investor protections. This is an industry initiative with ASISA and Futuregrowth has been an active participant. ☑ Improved ESG incorporation into investment decision making processes Enhance our investment process to incorporate ESG criteria across various fixed income asset classes and listed and private equity. We have continued to enhance our process to incorporate ESG criteria across various fixed income asset classes and listed and private equity. 1. State Owned Entities (SOE) The learnings on our SOE governance review which we published during the first quarter of 2018. http://www.futuregrowth.co.za/newsroom/futuregrowth-s-soe-governance-review-18-months-on/ http://www.futuregrowth.co.za/media/2373/futuregrowth soe-governance-unmasked electronic.pdf This followed our August 2016 announcement to the public and clients that we were suspending all further lending to 6 SOE's pending a full governance review. This suspension was partially lifted (with conditions and additional reporting) to certain of the SOEs. We considered ESG-related issues across our listed debt portfolios and this is evident in our Listed Credit Committee minutes andcredit reports. We voted on all debt that requires noteholder voting and engagement. 3. Unlisted Debt: We considered ESG-related issues across all of our unlisted issuers and this is evident in our Unlisted Credit Committee minutes and credit reports. We engaged in this area around governance improvements in particular, and in most cases made recommendations for borrowers to improve their governance. 4. Listed & Unlisted (Private) Equity We considered ESG-related issues across a range of our listed & unlisted equity portfolios, this is evident in our Investment Committee minutes and investment reports Other, specify (1) Other, specify (2) Other, specify (3) ☐ None of the above ☐ Increase portfolio performance by consideration of ESG factors Other, specify (1) Improved financial performance of investments by applying ESG incorporation into investment decision-making to understand the material ESG risks and ensure a risk-adjusted returns Focus on key material ESG risks. Yes, in orde	r to assess future climate-related risks and opportunities
	Describe
Yes, th	s is done to assess climate-related risks and ESG risks and the impact that these may have on financial forecasts, which in turn impact our
investr	nent/valuation models. This is conducted at an individual counter-party and not asset class e.g. we assessed the risks linked to our Agri exposure.
☐ No, our org	anisation does not currently carry out scenario analysis and/or modelling
G 13.2	Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic markets
	We do the following
☐ Alloca	ion between asset classes
☐ Deterr	nining fixed income duration
☐ Alloca	ion of assets between geographic markets
☐ Secto	weightings
☑ Other,	specify
We	consider ESG issues as part of our fixed income sectors allocation.
☐ We do	not consider ESG issues in strategic asset allocation
l	
G 13.3	Additional information. [OPTIONAL]
	pically decided to avoid any carbon intensive investments, this includes any new coal developments and instead have an exposure of approximately RE carbon assets like renewable energy in South Africa.
CC M	andatory to Report, Voluntary to Disclose Descriptive General
G 13.4 CC	Describe how your organisation is using scenario analysis to manage climate-related risks and opportunities, including how the analysis has been
0.10.100	interpreted, its results, and any future plans.
☐ Initial asse	sment
✓ Incorporati	on into investment analysis
·	, and the second
	Describe
	rms part of our fundamental analysis and ongoing review of companies when we consider ESG risks, these also include climate-related risks. If the risks
are ma	terial, and materially impact future cashflows, this will affect the rating and pricing of our investment decision.
☐ Inform acti	e ownership
☑ Other	
	anaifu
=	specify
Bondh	older activism and engagement
	Describe
In addi	ion to the fundamental analysis which includes the ESG and climate risk analysis, depending on how material the issue, we would engage the compan
	these risks are being addressed.

SG 13.5 CC	Indicate who uses this analysis.		
☑ Board mem	bers, trustees, C-level roles, Investment Committee		
🗹 Portfolio m	anagers		
☑ Potitolic managers ☑ Dedicated responsible investment staff			
☐ External ma			
	consultants/actuaries		
☑ Other			
	specify		
The an	alyst would use the information to inform the credit of	or investment committee for approval or changes to the risk rating e.g. cre-	dit rating
SG 13.6 CC	Indicate whether your organisation has evaluate	ed the potential impact of climate-related risks, beyond the investment tim	e horizon, on its
	investment strategy.		
O Yes			
✓ No			
	Please explain the rationale		
	olicitly, but we do consider these risks at a sector leve nee. Currently we are only evaluating the risks in teri	el as far as we have line of sight, this could in some instances mean beyond	the investment
SG 13.7 CC	Indicate whether a range of climate scenarios is	s used.	
🗹 Analysis ba	sed on a 2°C or lower scenario		
☐ Analysis ba	sed on an abrupt transition, consistent with the Inev	itable Policy Response	
☐ Analysis ba	sed on a 4°C or higher scenario		
☐ No, a range	is not used

SG 16	5	Mandatory Descriptive General
	SG 16.1	Describe how you address ESG issues for internally managed assets for which a specific PRI asset class module has yet to be developed or for which you are not required to report because your assets are below the minimum threshold.
	Asset	
	Class	Describe what processes are in place and the outputs or outcomes achieved

This sector, would follow a similar approach as reported on the fixed income, where we integrate ESG into the investment analysis process. This forms Inclusive part of our fundamental analysis when we screen for ESG issues as part of our credit process. All new funding requests would be part of our finance creditsubmission and would require Credit Committee approval. We have direct access to the CFO/CEO if we need to engage on any material issues. This sector, would follow a similar approach as reported on the fixed income, where we integrate ESG into the investment analysis process. This forms part of our fundamental analysis when we screen for ESG issues as part of our credit process. All new funding requests would be part of our Cash creditsubmission and would require Credit Committee approval. We have direct access to the CFO/CEO if we need to engage on any material issues. Mandatory Descriptive General Describe how you address ESG issues for externally managed assets for which a specific PRI asset class module has yet to be developed or for Asset Describe what processes are in place and the outputs or outcomes achieved Class • The fund advisors of our Agri Fund investments, UFF Asset Management, currently provides detailed ESG reporting on all farmland transactions that is compliant with IFC standards. • They are required to provide the ESG reporting for our quarterly and annual reports to our third-party clients. • In order to comply with GLOBALG.A.P., all our farms use Integrated Pest Management (IPM) Systems, which are tailored to local climate and Farmland conditions, and aim to prevent infestation or intervene without poisons where possible • UFF is also a signatory to the UN PRI Principles and Farmland Principles SG 18.1 ✓ Yes Listed Debt During 2019 we refined our ESG for the listed sector, customising our ranking to include deeper ESG metrics per sector, during 2019 we customised the following sectors e.g. Telecoms, Banking, Property to reflect the specific sector related ESG indicators, this then forms part of our credit ranking table measured against credit, financial and non-financial indictors per sector and peer group. The outcome of the ranking excercise would then influence the issuer rating in comparison to its peers Unlisted Debt & Equity We have developed an in-house ESG screening and baseline assessment tool for use with unlisted private debt and private equity. We are active in our engagement strategy within these asset classes and believe that through our proactive dialogue with both companies and clients we are able to raise awareness around issues of sustainability. In addition to the ESG tool which is a tick-box approach, we use a variety of credit heuristics that form part of our credit analysis process. A key area we have developed during 2016-2019 was the governance of the State Owned Entities (SOE) sector, we have developed a SOE ESG scorecard/heuristics to address the specific local issues that are relevant to the SOE sector. We continue to engage and implement this accross a range of SOEs during 2019 with much success We have also published our research findings and shared this with the broader investment market make this body of work publically available. $http://www.futuregrowth.co.za/media/2373/futuregrowth_soe-governance-unmasked_electronic.pdf$ O No Indicate whether your organisation typically discloses asset class specific information proactively. LEI 06.1	Indicate which processes your organisation uses to ensure fund criteria are not breached.		
Systematic checks are performed to ensure that stocks meet the fund's screening criteria			
✓ Automated IT	systems prevent investment managers from investing in excluded stocks or those that do not meet positive screening criteria		
☐ Audits of fund	holdings are undertaken regularly by internal audit function		
☐ Periodic audit	ing/checking of the organisations RI funds by external party		
☑ Other; specify			
We have a compliance department that ensues breaches are reported, corrected and communicated to clients invested in our funds.			
□ None of the above			
LEI 06.2	If breaches of fund screening criteria are identified, describe the process followed to correct those breaches.		
Traded breaches are automatically detected by our Statpro system, on a daily basis. We do not apply materiality to the definition of a breach and we operate decimals. Breaches are required to be rectified immediately.			
In terms of process. Once a breach is identified on Statpro, an email is sent to the relevant portfolio manager from the compliance team, via the Stat portfolio manager is required to immediately rectify the breach. Statpro automatically tracks the age of each breach, it will identify any breaches the			

rectified by the portfolio manager.

Breaches are reported to the Executive Committee (Exco) on a monthly basis and to the Futuregrowth Board of Directors on a quarterly basis and breaches are reported to clients.

LEI 07.1 Indicate the type of sustainability thematic funds or mandates your organisation manages.

Environmentally themed funds
Socially themed funds
Combination of themes

LEI 07.2 Describe your organisation's processes relating to sustainability themed funds. [Optional]

1. Defining developmental investments

Futuregrowth defines developmental investing (impact or thematic funds) as that which provides investors with both commercial returns and tangible social and developmental impact. In South Africa, the primary development focus is around the provision of basic services and infrastructure development.

2. Our range of thematic (impact) funds

- a. Development Equity Fund: The Futuregrowth Development Equity Fund has a small exposure to listed equity instruments and a majority of unlisted privately held equity in the fund. A portfolio specialising in equity and related investments in socially responsible projects and businesses or developmental assets, forms part of Futuregrowth's suite of developmental investments. The benchmark is CPI + 10%.
- b. Power Debt Fund: The Futuregrowth Power Debt Fund, a portfolio specialising in the investment of renewable energy projects and supporting industries, forms part of Futuregrowth's suite of developmental investments. The benchmark is the South African STeFI Composite Index.
- c. Agri-Fund: The Futuregrowth Agri-Fund, a portfolio specialising in the investment of agricultural land, biological assets, agricultural infrastructure and other related farming implements, forms part of Futuregrowth's suite of developmental investments. The benchmark is CPI + 10%.
- **d. Community Property Fund:** The Futuregrowth Community Property Fund has been acquiring and expanding shopping centres since 1996, catering to the needs of underserviced rural and township communities throughout South Africa. It is a flagship fund among our suite of developmental investments, with R2.1bn properties under management. The target return is CPI + 4%.
- e. Infrastructure & Development Bond Fund: The Futuregrowth Infrastructure & Development Bond Fund is a specialist yield enhanced bond portfolio, forms part of Futuregrowth's suite of developmental investments. The Composite targets high returns through a combination of moderate credit concentration limits, active interest rate risk management and active off-benchmark bets. The benchmark is the All Bond Index.
- f. Development Balanced Fund: The Futuregrowth Development Balanced Fund is a balanced portfolio providing investors with social impact by investing in a range of developmental investments, forms part of Futuregrowth's suite of developmental investments. The Composite has exposure to a range of asset classes from listed equity (Momentum SRI Tracker); bonds (Futuregrowth Infrastructure & Development Bond); unlisted property (Futuregrowth Community Property); unlisted equity (Futuregrowth Development Equity); inflation-linked bonds (Futuregrowth Power Inflation-Linked Bond) and cash. The benchmark is a composite weighting of the underlying funds' benchmarks.

3. Our philosophy

Futuregrowth is dedicated to the development and empowerment of South Africa and its people, with many of our products geared towards supporting change. We are passionate about improving the lives of all South Africans and so we're always striving to identify opportunities that will not only yield optimal financial returns for stakeholders, but also make recognised contributions to society. Our belief is that thriving communities result in thriving businesses, therefore, business can and should develop the communities in which they operate. We also believe that while providing a retirement benefit for members is critically important, so too is improving the lives of individuals and their families while they are still working.

4. Our process

Futuregrowth has a track-record of over 24 years of investing in developmental investments and the current capability is supported by the investment process We use a fundamental investment approach with active decision making and judgment applicable in all processes including all our developmental funds.

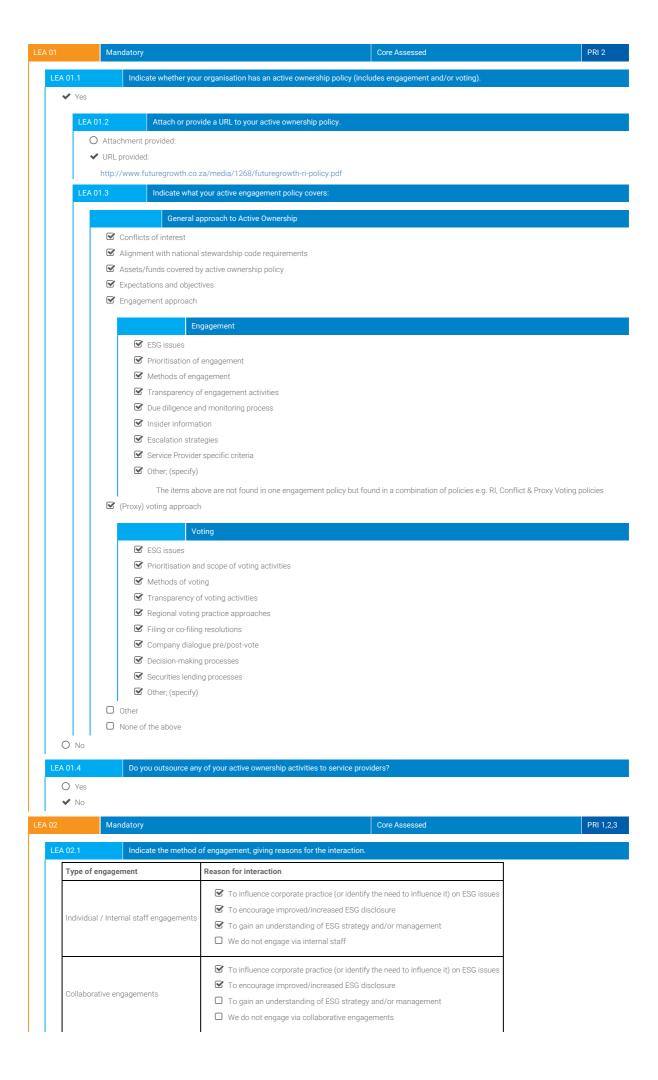

5. Our team

The team consists of a diverse group of professionals ranging from portfolio managers, credit analysts, client reporting, marketing and business development experts. The team leverages off the existing investment process and taps into resources from the interest rate and credit teams. A dedicated resource oversees all aspects of the Responsible Investment (RI) function within the company.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

We use a combination of screening, integration and thematic strategies applied to a majority of our investments. For some mandates with a developmental mandate the thematic option is applied, but across all others a combination of screening and integration strategies are applied.

- Screening: We use positive/best-in-class screening of investment in sectors, companies or projects selected for positive ESG performance relative to industry peers, this mostly relates to our developmental (impact) funds
- ESG integration: This is applied across the whole universe of FI and our developmental asset classes.
- Thematic: Within our range of developmental and non-developmental we have a large focus on investment in themes or assets specifically related to sustainability (e.g. renewable energy, sustainable agriculture, affordable housing, SME finance).

Provide a brief description of the ESG information used, highlighting any differences in sources of information across your ESG incorporation strategies.

In our developmental (impact/thematic) funds we use **negative** screening and exclude investments in microlenders in these mandates. Extract from news article: New blow for microlenders GRAMEEN bank founder Muhammad Yunus, widely considered the father of modern microcredit, issued a stern warning on Friday about how microlending could become "abusive" and be misused by lenders. This came in a week when Futuregrowth Asset Management said it would "wind down" its exposure to microlenders, including Capitec, African Bank and other unsecured lenders, on "moral grounds". This move is likely to invite greater scrutiny of the role these banks have played in granting credit to poorer South Africans already trapped in a debt spiral. With South Africa failing to create a meaningful number of jobs while cash-strapped consumers continue to struggle to repay loans, some experts have warned that the microcredit bubble could pop, raising the risk of social unrest. Futuregrowth Asset Management CEO Andrew Canter said that after 20 years of seeing personal unsecured lending as a "net social good" because it provided people with access to finance, his company had concluded after much soul-searching that the industry was no longer developmental. $Full \ article found \ here, https://www.businesslive.co.za/bd/companies/financial-services/2013-10-06-new-blow-for-microlenders/2013-10-06-new-blow-for-micr$ **☑** Example 2 SSA ☑ Corporate (financial) ☑ Corporate (non-financial) ☑ Environmental Social ☑ Governance ■ Negative/ exclusionary ☑ Positive/ best-in-class We use positive screening as part of our investment process by identifying sectors that promote social, infrastructure & economic development e.g. investment in infrastructure (water, roads, health, education), affordable housing, agriculture, renewable energy, as well as funding Development Finance Institutions(DFIs) that facilitate social & infrastructure development. SSA **☑** Corporate (financial) ✓ Corporate (non-financial)

☐ None of the above

FI 09.2

Additional information. [Optional]

In reference to FI 09.1 above on measuring impact, refer below.

Measuring Impact & Reporting

Futuregrowth recognises that different investments have different on-the-ground impact. For example, funding the provision of low-income housing has a much higher impact than holding a listed parastatal bond. And an investor, in addition to earning suitable risk-adjusted returns, may also want recognition for such a high-impact investment.

Measuring developmental impact is highly subjective. Futuregrowth classes all our developmental investments into High, Medium or Low impact, depending on the actual nature of the investments and/or funds. For example:

- High impact: infrastructure project finance, access to finance for the previously "unbanked", social infrastructure (health care, education, etc).
- · Medium impact: investor engagement
- . Low impact: environmentally-screened ethical investments.

FI 10 Mandatory De

PRI 1

FI IU. I

Describe your approach to integrating ESG into traditional financial analysis.

OUR APPROACH

Futuregrowth believes that engagement with investee companies on matters of ESG is appropriate to ensure long-term sustainability for all stakeholders. We believe in collaboration with investee companies and engaging with management to encourage companies to think about their approach to integrating, disclosing and reporting on ESG issues.

We believe that our role within the investment community is to encourage companies to aspire to responsible ways of doing business, by engaging and collaborating with them. We will jointly aspire to change the landscape of the investment community and be more responsible corporate citizens.

INCORPORATING ESG INTO AN INVESTMENT PROCESS

We believe that investment processes may profitably and suitably include the analyses of environmental, social and governance factors (ESG) in the assessment of investments.

Futuregrowth's ESG framework integrates ESG issues into the investment analysis and decision process with the view of mitigating overall portfolio risk.

The ESG framework seeks to achieve the following outcomes:

- · Screen investments using the ESG factors as part of the due diligence process; Evaluate ESG risks;
- · Monitor the ESG activities of companies;
- · Measure how companies improve over time;
- · Engage with companies when risks are identified;
- Report to stakeholders on ESG issues in our investments in a transparent and accountable manner.

FI 10 2

Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.

SSA

We apply fundamental analysis but would include a more prominent focus and Governance and Social issues.

Refer to a recent case study on the subject, which displays our process in apply ESG to the various SSA's in Fixed Income. Below is an excerpt from the (Guidance and Case Studies for ESG Integration: Equities and Fixed Income, authored by the CFA Institute and the PRI), please refer to the link below for the full case study.

http://www.futuregrowth.co.za/newsroom/guidance-and-case-studies-for-esg-integration-equities-and-fixed-income/

RESPONSIBLE INVESTING IN DEBT CAPITAL MARKETS: UNPACKING GOVERNANCE FOR SOES

Futuregrowth Asset Management has been a substantial funder of national development through its investment in the debt issued by many of South Africa's state-owned enterprises (SOEs). SOEs, by their very nature as publicly funded entities, are not subject to the same market discipline or shareholder oversight as other entities. Recent corporate failures (African Bank Limited, Steinhoff International Holdings NV), as well as serious allegations of malfeasance at certain SOEs (as revealed by South Africa's Public Protector), have demonstrated the need for appropriate and strong governance checks and balances—applied equally to both public and private companies. In addition, the assessments of S&P Global Ratings (a subsidiary of Standard & Poor's Financial Services LLC) and Fitch Ratings Ltd., which place South Africa's sovereign debt at one level above a rating of junk, have raised concerns that the government debt guarantees to SOEs (which totaled ZAR467 billion at the end of March 2017) pose significant risks to South Africa's decirated and ratings outlook (see Figure 1).

Corporate (financial)

We have adapted our process for listed and private companies as outlined below.

1. Corporate (financial) - Listed

- We use a combination of methods and information sources, we rely on publicly available information e.g. company Integrated Annual Report, in addition external ESG and sector research and lastly internal research and fundamental analysis on the company.
- We have adapted the process by developing a propriety sector specific ESG ranking and rating tool that incorporates sector specific metrics and indicators to develop comparative ESG analysis.

2. Corporate (financial) - Private

- We use a combination of methods and information sources, we rely on publically available information e.g. news-flow our internal ESG scorecard which the company completes in addition, sector research and our own internal fundamental analysis.
- We are also constantly adapting our proprietary ESG analysis and tools.

Corporate (non-financial)

We have adapted our process for listed and private companies as outlined below.

1. Corporate (financial) - Listed

- We use a combination of methods and information sources, we rely on publicly available information e.g. company Integrated Annual Report, in addition external ESG and sector research and lastly internal research and fundamental analysis on the company.
- We have adapted the process by developing a propriety sector specific ESG ranking and rating tool that incorporates sector specific metrics and indicators to develop comparative ESG analysis.

2. Corporate (financial) - Private

- We use a combination of methods and information sources, we rely on publically available information e.g. news-flow our internal ESG scorecard which the company completes, in addition, sector research and our own internal fundamental analysis.
- We are also constantly adapting our proprietary ESG analysis and tools.

Securitised

The securitisations would follow the same process as mentioned above, we would adapt the process to those which are applicable for securitisations.

This forms part of our credit due diligence process and our annual review process when we review apply fundamental analysis and integrate ESG screening as part of this process for all new and existing issuers.

We apply fundamental analysis but would include a more prominent focus and Governance and Social issues.

- Water Boards: Engaged the Water Boards on governance matters relating to the outcome of the annual review. As part of the ESG annual review focused on the board, governance practices and water quality. Governance within the water boards present a real risk to the continued stability of the water boards e.g. irregular expenditure
- S0Es: Continuing with the one-on-one engagements with a various S0Es to improve their DMTNs.

Refer to a recent case study on the subject, which displays our process in apply ESG to the various SSA's in Fixed Income. Below is an excerpt from the (Guidance and Case Studies for ESG Integration: Equities and Fixed Income, authored by the CFA Institute and the PRI), please refer to the link below for the full case study.

http://www.futuregrowth.co.za/newsroom/guidance-and-case-studies-for-esg-integration-equities-and-fixed-income/

RESPONSIBLE INVESTING IN DEBT CAPITAL MARKETS: UNPACKING GOVERNANCE FOR SOES:

Futuregrowth Asset Management has been a substantial funder of national development through its investment in the debt issued by many of South Africa's stateowned enterprises (SOEs). SOEs, by their very nature as publicly funded entities, are not subject to the same market discipline or shareholder oversight as other entities. Recent corporate failures (African Bank Limited, Steinhoff International Holdings NV), as well as serious allegations of malfeasance at certain SOEs (as revealed by South Africa's Public Protector), have demonstrated the need for appropriate and strong governance checks and balances—applied equally to both public and private companies. In addition, the assessments of S&P Global Ratings (a subsidiary of Standard & Poor's Financial Services LLC) and Fitch Ratings Ltd., which place South Africa's sovereign debt at one level above a rating of junk, have raised concerns that the government debt guarantees to SOEs (which totaled ZAR467 billion at the end of March 2017) pose significant risks to South Africa's deficit and economic and ratings outlook (see Figure 1).

This forms part of our credit due diligence and annual review process when we review and apply fundamental analysis and integrate ESG screening as part of this process for all new and existing issuers

One of the sectors we focused on as part of an annual sector review was the South African Banks (we covered the big 5 banks locally). There was a focus on governance, some of the areas covered included a range of issues e.g. risk management, regulatory risks, board composition etc.

- . Most of the banks complied with the strict King IV requirements
- On average most of the banks have around 16 member boards: Long tenures resulting in fewer independent directors in Futuregrowth's view.
- Individual boards reflects a strong mix skills: financial, business and legal skills represented by the number of CA's, MBA's and LLB qualifications; A common theme is a lack of board members with a depth of IT and risk management experience
- Subject to a high degree of regulatory oversight, which requires data governance and IT systems to comply with regulatory requirements: Highly exposed to IT related risks (e.g. cyber-crime; IT security; protection of personal customer information; etc.).

Corporate (non-financial)

This forms part of our credit due diligence and annual review process when we review and apply fundamental analysis and integrate ESG screening as part of this process for all new and existing issuers.

One of the sectors we focused on as part of an annual sector review was the **Affordable Housing Property** sector.

Affordable Housing: Risk analysis and engagement on affordable housing projects (an example of some of the issues):

- Board independence & diversity
- · Succession planning
- · Risk assessment and framework
- · Human capital & skills development since we identified key man dependence
- Transformation & BFF plan

Securitised

Securitisations forms part of our credit due diligence and our annual review process when we review and apply fundamental analysis and integrate ESG screening as part of this process, for all new and existing issuers and would apply the above processes to the securitisations, as its applicable and will vary according to the sector the securisation is exposed.

- For securitsations where we also have direct exposure to the parent company, the same ESG analysis applied at the borrower holding level would be applicable at the securitisation
- In instances where we only have exposure to the securitisation; this process is still being refined in terms of the applicable criteria and remains a work in progress

Our passive funds make up less than 5% of total AUM, we follow a similar approach to our fixed income process (but in this case the focus would be more on screening the parent company/guarantor) and a larger focus on the governance.

FSG issue and explanation

Continuing with the one-on-one engagements with a various SOEs to improve their DMTNs. This follows our body of work around SOE governance, which we started in 2016, which is still ongoing in terms of engaging for improved market transparency including reporting.

Engagement

Impact on investment decision or performanc

Continuing with the one-on-one engagements with a various SOEs to improve their DMTNs, which will result in better protections for investors.

☑ Example 2

Corporate (financial)

ESG issue and explanation

As part of our ESG integration and analysis, we conducted a Bank sector review of the big 5 banks in South Africa, we concluded on the following:

- Individual boards reflects a strong mix skills: financial, business and legal skills represented by the number of CA's, MBA's and LLB qualifications: A common theme is a lack of board members with a depth of IT and risk management experience.
- Subject to a high degree of regulatory oversight, which requires data governance and IT systems to comply with regulatory requirements: Highly exposed to IT related risks (e.g. cyber-crime; IT security, protection of personal customer information; etc.).

Integration

Impact on investment decision or performance

We consider these medium to long-term risks for the banking sector. We continue to engage, monitor change or lack of change, which could negatively/positively affect the credit ratings for the banks.

☑ Example 3

Corporate (non-financial)

ESG issue and explanation

As part of our ESG integration and analysis, we conducted a Retail sector annual review based which included ESG integration & engagement with retailers on the issues of board diversity, tenure and transformation.

- Board diversity: lack of boar diversity in terms of representing the South African demographics
- Board tenure: long director tenures impact the independence, comprised risk management and oversight.
- Transformation: A medium to long-term risk to the industry is not having sufficient transformation relating to BBBEE, this remains a risk and could have an impact in terms of licence to operate in the South African context.

Integration

Impact on investment decision or performance

Medium to long-term risks for the retail industry. We continue to engage, monitor change or lack of change, which could negatively/positively affect the credit rating.

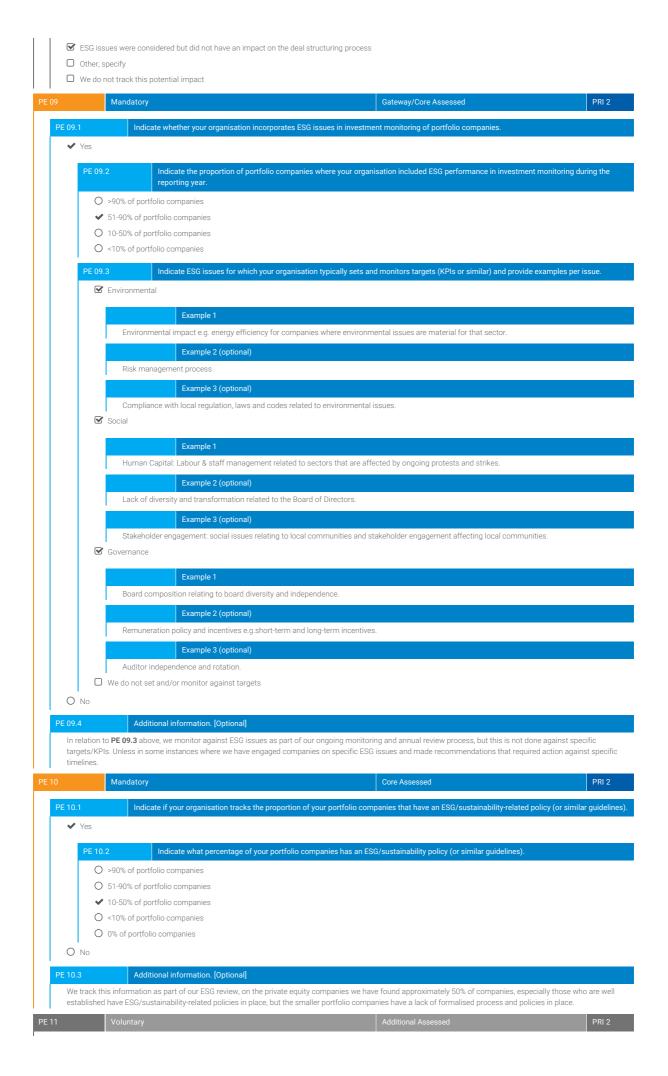

- ☐ Example 4
- ☐ Example 5

The Development Equity Fund (DEF), which invests in private equity assets, is managed in a fiduciary manner by Futuregrowth who are responsible for investment process, governance, administration and reporting. It is not a typical Private Equity fund model, since a "Private Equity" model may be deemed inappropriate for the development equity asset class. Private Equity model funds tend to have aggressive incentive fees and short time horizons that rush the manager to make both investments and realisations (notwithstanding deal flow and the life-cycle of the underlying assets). The funds are limited-life, and fees on undrawn commitments together with aggressive incentive fees give rise to inherent conflicts between managers and clients. Often, they require: very constrained risk mandates. · lock-in periods for investors, · active investor involvement in decision making and governance, and expensive and specialised third-party administration, accounting, reporting and valuations Furthermore, private equity managers often lack the scale of larger asset managers and are usually restricted to managing a small number of funds at any time, which gives rise to shifting attentions due the business imperative to raise new funds. Taken in combination, these restrictive mandates, complex governance, approval and reporting processes, distorted time horizons and aggressive time-based fees, are likely to distract the manager from investment matters and social impact requirements, and impair fund investment opportunities. This combination of factors reduces the willingness of retirement funds to participate in Private Equity model funds, notwithstanding that the asset class itself may offer suitable risk adjusted returns. Futuregrowth favour the "Fiduciary Manager" model that relies on the investment processes, governance structures and administration processes of an independent asset manager with scale, and where the clients" interests are paramount. By avoidance of mis-incentive, conflict, and short time horizons, this model avoids excess governance costs and constraints, and allows the manager to build the fund and investment process as a going-concern with a long time horizon. This allows more focus on investment-related issues whilst also gearing the capacity of the manager's organisation and reducing costs for the benefit of both parties. The avoidance of conflict allows the fund to have a broader risk mandate (as is suitable to the asset class) to facilitate deal flow and fund diversity. While liquidity of investors" interests must always be related to the underlying fund holdings, investors" liquidity and decision flexibility should be materially improved by the use of an open-ended model as opposed to a Private Equity model. In the Fiduciary Manager model the clients" first source of control is in defining the mandate of the fund, and the clients" ultimate control is to withdraw his funds from the Manager without cost or material contractual restraint PRI 2 Indicate whether your organisation's investment activities are guided by a responsible investment policy / follow responsible investment guidelines Our investment activities are guided by a responsible investment policy Describe how your organisation outlines expectations on staff and portfolio companies' approach towards ESG issues in investment Our investment activities are guided by a responsible investment policy, in addition, the mandate that governs the investments in private equity assets, outlines The responsible investment guidelines and the developmental (impact) mandate outlines the targeted sectors (positive screened) and those that are excluded (negative screened) sectors The guidelines define relevant thematic sectors for the investment universe. • Futuregrowth favour the "Fiduciary Manager" model that relies on the investment processes, governance structures and administration processes of an independent asset manager with scale, and where the clients" interests are paramount. By avoidance of misincentive, conflict, and short time horizons this model avoids excess governance costs and constraints, and allows the manager to build the fund and investment process as a going-concern with a long time horizon. This allows more focus on investment-related issues whilst also gearing the capacity of the manager's organisation and reducing costs for the benefit of both parties. The avoidance of conflict allows the fund to have a broader risk mandate (as is suitable to the asset class) to facilitate deal flow and fund diversity Our investment activities are not guided by a responsible investment policy O We do not have a responsible investment policy PRI 1,4,6 Indicate if your most recent fund placement documents (private placement memorandums (PPM) or similar) refer to responsible investment. ✓ Yes Indicate how your most recent fund placement documents (PPM or similar) refer to the following responsible investment: Policy and commitment to responsible investment $\hfill \square$ Approach to ESG issues in pre-investment processes □ Approach to ESG issues in post-investment processes Approach to ESG reporting Describe how your organisation refers to responsible investment in fund placement documents (PPMs or similar). [Optional] This is outlined in the investment guidelines and mandate for our Developmental Equity Fund, which invests in private equity assets, please refer to PE.02.2. PE 11.2	Describe how your organisation contributes to the portfolio companies' resourcing and management of ESG issues.	
We have contribut	ted to the portfolio companies in a variety of ways; this would be dependent on the size, age and expertise of the company in the following a	areas:
-	dividual engagements with boards and/or with senior management on ESG risks identified and how this is being managed and mitigated by	y portfolio
companies. Through thi	is engagement process, the company would then identify their material ESG risks and weaknesses, in a majority of instances, these	
companies	recognised that implementing changes would be beneficial and would ensure the sustainability of the company in future.	
2 Volu	intary Descriptive	PRI 2,3
